

Nebraska Wind Energy and Wildlife News

January 12, 2012

Hello,

My name is Caroline Jezierski and I am the Nebraska Wind Energy and Wildlife Project Coordinator at the University of Nebraska - Lincoln (UNL). The goal of my position is to facilitate wind power site selection and operation that balances the ecological, sociological, and increased energy development needs of Nebraska.

In the recent month, there have been several interesting developments on the wind energy and wildlife front. I would like to share information such as this with those who are interested through email notifications via a listserv based at UNL. Information on how to subscribe to the listserv is listed below or contact me via email at windwildlife@unl.edu.

Email notifications will include Nebraska-specific and nationwide information about wind energy with a focus on the environment and wildlife, event announcements, and a link to an internet newsletter that I curate. I update the newsletter multiple times a week and it can be accessed anytime from this link: <http://www.scoop.it/t/wind-energy-and-wildlife>. Please check it out. I am also in the process of developing a website that I will be launching very soon.

If you have any questions about becoming a part of the listserv or any wind/wildlife related questions, please contact me. Also, please forward this email onto anyone you think may be interesting in receiving wind energy and wildlife updates.

Thanks,
Caroline

Caroline Jezierski
Wind Energy and Wildlife Project Coordinator
Nebraska Cooperative Fish & Wildlife Research Unit
314 Hardin Hall
3310 Holdrege Street
